ToughSonic sensors with SensorView™ software put the power of ultrasonics in your hands yet retain the simplicity of push-button TEACH setup. You can quickly adjust, optimize, save, and clone your applications without calibration!

ToughSonic sensors contain a rugged transducer potted in a stainless-steel housing for long life.
Outputs respond to measured distance and non-contact technology means nothing touches your materials. Many applications exist in all industries.

Contact Senix today to discuss your specific needs.

Free Functionality

Use adjustable interface features like switch hysteresis and time delays to build complete solutions such as pump or material flow controllers. Save cost by eliminating PLCs, delay circuits, and time delay relays!

PC Setup Power!

PC Programming Software

Use SensorView™ software (see separate data sheet) to select and adjust all interfaces, timing parameters, filters, and modes. Then view, analyze, or log data to optimize your application.

Flexible Configuration

Flexible configuration means fewer parts to stock and quick duplication! Higher volume OEM options are available.

Push Button "Teach"

Push-button "teach" features provide for several common adjustments when a PC is not available.

Multiple Outputs

In addition to the model's RS-232 or RS-485 serial data interface, there are five simultaneous outputs, fully configurable with SensorView™.

Analog Outputs (3)

Analog Outputs include 0-10 VDC and dual 4-20 mA current loops (sinking and sourcing). These outputs have user-selectable voltage/current ranges, adjustable endpoint distances, slope reversal, timing parameters, and much more.

Switches (2)

Switches are SensorView™ configurable as "PNP" or "NPN" type (sourcing or sinking). Each has adjustable set point, hysteresis, window, initial conditions, ON delay, OFF delay, and loss of target response for ultimate flexibility.
